

## ABOUT US

Carbon capture and storage (CCS) is an integrated suite of technologies that can help us reach net-zero emissions of CO<sub>2</sub>. It is a proven technology and has been in safe, commercial operation for nearly 50 years, and the Global CCS Institute's Mission is to accelerate the global deployment of CCS through our advocacy, thought leadership and knowledge sharing, supported by our Membership and fee-for-service consultancy.

## WHO WE ARE

We are an influential and collaborative think-tank, and have the local and global networks, expertise, reputation, and passion to create positive change. When you join us, you expand your career opportunities by gaining international experience and becoming part of a team of skilled, purpose driven professionals connecting with leading governments, NGOs, projects, researchers, and institutions to facilitate people and ideas coming together. Although active globally, we are headquartered in Melbourne, Australia and can also be found in Washington D.C., Houston, London, Brussels, Abu Dhabi, Beijing, and Tokyo.

As part of our team, you gain access to benefits that support you personally and professionally, from career aspirations to overall well-being. Our benefits may vary from time to time, and country-specific benefits may also apply in addition to the global benefits. Ask the People Team for more information on benefits in your location.
